Services offered are the customary services in the field of questioned documents examination. Almost half the case load comprises consultations by other document examiners or requests to become associated in the case to provide back-up opinion or specialized, sophisticated services.

Many cases involve confidential consultations requiring critical evaluation of opposing expert reports, opinions and testimony. The extensive databases maintained in the office, with a professional library of more than 8,000 items as of this writing, enable the providing of a quick turn-around time in such consultations. Most practitioners seem to have some serious lack in observation, science or logic which a skilled cross-examining attorney can effectively exploit and a competent opposing expert can easily counter to facilitate acceptance of the truth. However, it would be unethical to make any impeachment a personal or professional attack of one expert upon another.

QDE INDEX

A Guide to Periodical Articles in English On Document Examination, Handwriting Expertise And Expert Testimony

INTRODUCTION

A. HOW THE INDEX CAME TO BE

In late 1986 I was injured and had idle time. So I went to San Francisco County Law Library to research legal publications on aspects of questioned documents. Journals had a wealth of materials. I collected copies for my professional library, which now exceeds 10,000 items. Having compiled a database for my own use, I thought others might find it of value, so the first edition of this index was issued in 1990 with the title *Witnessing to the Truth of Documents*. R. N. Totty gave a generous review of it in *Forensic Science Society Journal*, but he pointed out the title was inappropriate. Thus the new name, *QDE Index*. I trust the new 2008 edition has incorporated suggestions many have generously offered over the years. Your kindness in advising me of possible corrections and improvements would be appreciated.

How are entries chosen? First, any article of interest to document examiners which has been found in either forensic or legal journals is included. For these journals the selection is liberal, so that even peripheral topics are included. Book reviews are listed as of this edition. For all other journals, the article must be specific in topic and of a practical utility. There are two major applications of this last guideline: materials from medical journals and discussions of graphology.

Medical journals often report original research concerning the relationship between handwriting traits and health factors. Only those reports which directly assist in describing graphic traits specific to the health factors are included. Thus less than five percent of all medical periodical literature surveyed is included. As to graphology, only discussions appearing in legal or forensic literature are included. Even items wholly given to discussions of questioned document examination, but appearing in a journal solely graphological in orientation, would not be included. A journal of mixed nature would be included provided the item is of some substance or by a person presenting as a document examiner. You might need to know of the person's writing.

Last of all, no pertinent item meeting the criteria set forth would be omitted, whatever my personal view of it. In very rare cases an editorial note is inserted because

the item might otherwise be especially misleading. I have been restrained in this regard. An editor/compiler must be as unintrusive as possible.

B. ORGANIZATION OF THE INDEX

This data CD holds six files, all retrievable and searchable in Adobe Acrobat Reader. If you do not have Adobe Reader, it is free on the Adobe Acrobat web page:

<http://adobe-reader.download-free.net/adobe/>

Going alphabetically, the six are:

1. AUTHOR INDEX,
2. CASE LAW INDEX,
3. INTRODUCTION, the file you are now reading,
4. QDE INDEX 2008,
5. SUBJECT-KEY WORD INDEX, and
6. TABLE OF CONTENTS.

1. AUTHOR INDEX

This is a guide to all authors listed in *QDE Index 2008*. All references are to item entry numbers. Alternative forms of an author's name are listed with reference to the form under which the author is indexed. Often journals only give initials for an author's first and/or middle names, and it is difficult to know whether such a name is the same person for whom a full name is given in another journal. Readers are asked to advise me if they know of any mistake in author identification.

2. CASE LAW INDEX

This index permits you to find discussions on specific published court cases. All references are to item entry numbers.

3. INTRODUCTION

This is the file you are now reading. It describes the *QDE Index 2008* and how to use it.

4. QDE INDEX 2008

This is the body of the index and consists of 4241 numbered entries versus 3,691 in the 2003 edition. Some numbered entries are for multiple papers accounting for another 189 articles. Citations are listed alphabetically by journal and chronologically within the same journal. Some entries refer the user from alternative names for a few journals to the form chosen in *QDE Index 2008*. The full title of a journal is given for the first entry and an abbreviated form of the name for all following entries for the same journal. Ways in which to use *QDE Index 2008* are discussed later. Occasionally there is an EDITOR'S NOTE in square brackets to provide critical information, usually a caution.

5. SUBJECT-KEY WORD INDEX

This is a guide to all key words and subjects terms used in *QDE Index 2008*. All references are to item entry numbers. Alternative forms of terms used are listed with reference to the form used. These references by use of the word “SEE:” There are references between related entries, by use of the words “SEE ALSO:” For some entries there is an explanatory sentence called “NOTE:”

I have arbitrarily employed some conventions. For example, a word in brackets, [--], has been added to some terms. Thus, “document examination” would be indexed most uselessly if used alone. So “[profession]” is added to it when the discussion is specifically on the field itself, otherwise it is not indexed. More will be said of this later.

6. TABLE OF CONTENTS

This lists all journals for which there is at least one entry. The number give is the number of the first entry in *QDE Index 2008*.

C. DIRECTIONS FOR USE

To find all journal articles for your topic of interest, go to the *Case Law Index*, the *Author Index*, or the *Subject-Key Word Index*. The numbers in these three indices refer to the item numbers in *QDE Index 2008*. To study the coverage of a particular journal, simply go to the section of *QDE Index 2008* listing all papers indexed from it.

Use the index as a study guide for a topic you wish to research. Use it to support the reliability and admissibility of your testimony. For example, the heading “Handwriting research” lists 140 reports on primary research studies in handwriting. I assure the reader I have not successfully backtracked and included all relevant papers for that topic. Thus, you can safely assure a court of law that in both our field and others there is substantial scientific research validating our theories and demonstrating the reliability of our methods. This spans more than 100 years. I am confident that I will continue finding applicable studies in academic journals by scientists who never had a thought they were contributing support to us, particularly in the medical literature.

To build your own collection, you can take the index to a law library or other academic library and go right down the shelves of their periodical collection. You can select the journals listed and make a fair usage copy for your personal reference. You can also hire people who do such things for a living. Interlibrary loan through your local public library is an excellent service, often without cost. Subscribe to journals in our field, or contact the journal itself for copies of back issues, or best of all contact the author of the piece. Respect the provisions of the copyright laws. Thus I do not provide copies of items outside of fair usage when engaged in a case. As Holy Scripture tells us, the laborer is deserving of fair payment.

D. SAMPLE ENTRIES

The following is a typical entry, the first for Joel Harris' excellent journal:

1873. International Journal of Forensic Document Examiners.

1:3-5, Jan.-March 1995.

Commentary. Author(s): Grasman, Harold J. Becker, Jo Ann L. Key words for index: Dating inks.

The title of the journal is given in full, since it is the first entry for this journal. "IJFDE" is used for each subsequent entry for this journal. The numbers "1:3-5" mean volume one, pages 3 through 5. The date of the entry is given as completely as possible. Often bound journals in libraries no longer permit one to find out the date of the issue, only the year and volume number.

The title of the article is given next: “Commentary.” “Author(s):” lists the authors in the order in which they appear in the journal. Each author will be found in the *Author Index* with reference to entry number 1873. “Key words for index:” gives entries from the *Subject-Key Word Index* under which you will find this paper cited. Also, if the title of the paper includes a subject or a key word term which is employed for indexing, it is not repeated as a key word. Note that the indexing system is a mixture of subject and key word indexing. That gives it some of the virtues and some of the drawbacks of both systems, but the combination relieves me of a massively more amount of work and provides great flexibility.

A sample of an *Author Index* entry is:

Grant, Julius	407, 875, 1280, 1284, 1289, 1295, 1309, 1342, 2002, 2313, 2628, 3353, 3358, 3363, 3364, 3366
---------------	---

An example of a *Subject-Key Word Index* entry is:

Dating inks 405, 1763, 1843, 1874, 1880, 1886, 1918, 1931, 1938, 2028-2030, 2062, 2068, 2824, 2856, 2858-2860, 2907, 2935, 2962, 2980, 3016, 3027, 3030, 3034, 3215, 3460, 3556, 3584, 3762, 3886, 3888, 3889, 3894, 3896, 3904, 3942

NOTE: Includes artificial methods for aging inks; for natural processes of aging, SEE: Aging of inks

Notice the explanatory note and the “SEE” reference.

E. THE SYSTEM FOR THE *Subject-Key Word Index*

The subject indexing system works this way. If the title of the article has terms which satisfy the needs for subject indexing, no further key words are added. If the title does not, a notation is added to the entry called “Key Words for Indexing:” Terms for subject

indexing are mostly chosen because they are the most prevalent expressions authors employ. If there is not a most common term, one with some general use or one created to cover a specific topic is employed. "SEE" references are made from alternative forms which are not used.

At times there is added a word in square brackets, [--], to create an indexable term. This is often necessary to avoid generating an index entry which is useless. For example, suppose we have two articles titled thus: "The practice of document examination." And: "Use of UV and IR in document examination." The first concerns the profession of document examination, the second does not. So an arbitrary method for indexing only papers on the profession of document examination is to add a word in brackets thus: "The practice of document examination [profession]." That is done with a number of topics.

Another convention of the indexing system is to provide coverage under both general and specific terms for the same topic. Thus, "Thin layer chromatography," "Gas chromatography" and "Paper chromatography" are all indexing terms as well as "Chromatography." Under the latter you will find all citations given under the first three plus other types of chromatography cited. A third convention is used for placing together related aspects of different topics. "Dating of handwriting," "Dating of documents" and other "Dating" headings put all entries relating to how to date things together. Similarly, several headings begin with "History of" and "Identification of."

In the Subject Index there are "SEE ALSO" references from terms used to related topics, and "SEE" references guide you from terms not used to those that are. Some terms are clarified with a note when the precise meaning in *QDE Index 2008* may be subject to misunderstanding. I am sure that some will take exception to my choices of indexing terms. For example, those who analyze literary productions in order to identify, or attribute qualities to, the author use several terms for what they do. I put them all under "Stylistics" and provide "SEE" references from all the other terms, almost a full dozen. Yet I suspect practitioners of these methods see enormously real differences reflected in the various terms. But it is impractical to have only one entry under "Textology."

F. REQUEST FOR ASSISTANCE

All distribution of *QDE Index 2008* is through Jacqueline A. Joseph, Forensic Document Examiner, Portland Oregon. For purchases, e-mail or call:

joseph@jjhandwriting.com

Let your fiends and associates know of the index and its value to you. Inquiries for group or bulk purchases are welcome. If you suspect there is a pirated edition, please let me know.

This index is the fruit of many people's labors, but mainly thousands of hours of my time. If a thousand people purchase *QDE Index 2008*, I would not even profit one dollar for each hour. Bibliographic guides in the field of law guided the effort at finding

the original source material. Many journals were surveyed issue-by-issue. To bring this project to perfection, contributions from many members of the profession are necessary. I am grateful to those who alert me to their own published articles and even gift copies to me.

Once more, let me know of any mistakes or omissions you find in the index. Feedback from a handful of users has solved many difficulties and refined the subject indexing system. Please supply citations for papers which I have missed and you know of. Particularly send in citations of articles you have published regarding document examination. Newspaper articles and newsletter articles are generally outside the scope of coverage.

If you subscribe to a journal not yet covered, do one of three things. Send full bibliographic information for each relevant article, or photocopy the tables of contents, or, far better, lend the entire file so that I can make a precise indexing. I would respect any guidelines you require and would protect the material as I would my own most treasured books. About 90 percent of entries are based on my personal inspection of the material. A few entries are solely from information given me. Previously I hesitated to include all such items, but the thought is that you deserve every assistance in your researches. Although I endeavor to make entries as accurate as I can, my only guarantee is that any omission or error is entirely inadvertent. I know there must be mistakes, because I have found them and corrected those I found.

I dedicate this edition of *QDE Index 2008* to all who have supported it. I am particularly grateful to the document examiners who have reported how much they find of value in the publication.

2832. JFS. 31:365-75, Jan. 1986.

Document evidence and some other observations about the Howard R. Hughes "Mormon Will" contest.

Author(s): Harris, John J.

Key words for index: Dummar, Melvin. Hughes, Howard R. Mormon Church.

2833. JFS. 31:455-63, April 1986.

Laser excited luminescence of inclusions and fibers in paper matches.

Author(s): VonBremen, V.

Key words for index: Identification of paper.

2834. JFS. 31:489-93, April 1986.

Preliminary examination of machine copier toners by infrared spectrophotometry and pyrolysis gas chromatograph.

Author(s): Zimmerman, Jeannine. Mooney, Dennis. Kimmett, M. Jennifer.

2835. JFS. 31:580-8, April 1986.

Alcohol and its effect of handwriting.

Author(s): Galbraith, Nanette G.

Key words for index: Alcohol and handwriting. Handwriting research.

2836. JFS. 31:655-7, April 1986.

Technique for transferring ink from a written line to a thin-layer chromatographic sheet.

Author(s): Kuranz, Robert L.

Key words for index: Thin-layer chromatography. Transferred writing.

2837. JFS. 31:710-8, April 1986.

Comparison of modern typestyles.

Author(s): Anthony, Arthur T.

Key words for index: Comparison of typewriting.

2838. JFS. 31:825-39, July 1986.

Lasers and optical spectroscopy in questioned document examination.

Author(s): Sinor, Timothy. Wilde, Jeffrey P. Everse, Kathleen E. Menzel, E. Roland.

2839. JFS. 31:1113-8, July 1986.

Restoration and identification of watersoaked documents.

Author(s): Taylor, Linda R.

Key words for index: Identification of documents. Restoration of documents. Water damaged documents.

2840. JFS. 31:1330-40, Oct. 1986.

Color comparison in questioned document examination using microspectrophotometry.

Author(s): Olson, Larry A.

2841. JFS. 31:1450-4, Oct. 1986.

Paper match comparisons by submersion.

Author(s): Gerhart, F. James. Ward, Dennis C.

Key words for index: Matches [combustion].

2842. JFS. 32:100-9, Jan. 1987.

Examination of the Josef Mengele Handwriting.

Author(s): Epstein, Gideon.

Key words for index: Mengele, Josef.

2843. JFS. 32:110-17, Jan. 1987.

Identification of the handwriting of Josef Mengele.

Author(s): Crown, David A.

Key words for index: Mengele, Josef.

2844. JFS. 32:118-20, Jan. 1987.

Line quality; historic and contemporary views.

Author(s): Hilton, Ordway.

Key words for index: Shading in handwriting.

2845. JFS. 32:121-9, Jan. 1987.

Characteristics of synchronous sequential signatures.

Author(s): Foley, Robert G.

Key words for index: Sequential writing. Synchronous writing.

2846. JFS. 32:130-6, Jan. 1987.

Recognition and identification of multiple authorship.

Author(s): Gencavage, John S.

Key words for index: Identification of handwriting. Multiple forgery.

2847. JFS. 32:137-47, Jan. 1987.

Individuality of toolmarks produced by a label maker used to write extortion notes.

Key words for index: Anonymous letters. Label makers.

2848. JFS. 32:245-7, Jan. 1987.

Was the document reinserted in the typewriter?

Author(s): Horan, James J.

Key words for index: Typewritten document examination.

2849. JFS. 32:282-4, Jan. 1987.

Fraudulent photocopy of a promissory note.

Author(s): Osborn, Paul John.

Key words for index: Photocopies. Verification of signatures.

2850. JFS. 32:539-42, March 1987.

Examination of correction fluid obliterations.

Author(s): Waggoner, R.

2851. JFS. 32:565-6, March 1987.

Cutaneous ink stain. A tipoff to suicide or suicide note.

Author(s): Hanzlick, Randy L. Ross, Wayne K.

2852. JFS. 32:629-39, May 1987.

Printwheel typescript variations caused by the manufacturing process.

Author(s): Behrendt, James E. Muehlberger, Robert J.

Key words for index: Print wheel typewriter. Variation in typewriters.

2853. JFS. 32:640-9, May 1987.

Restoration of stamp marks on steel components by etching and magnetic techniques.

Author(s): Turley, Dennis M.

Key words for index: Magnetism. Metal surfaces. Restoration of documents.

2854. JFS. 32:963-74, July 1987.

Image processing and statistical analysis as an aid in the comparison of typewritten impressions.

Author(s): Noblett, Michael G.

Key words for index: Comparison of typewriting. Statistical methods.

2855. JFS. 32:1118-24, July 1987.

Triazolam, handwriting and amnestic states. Two cases.

Author(s): Boatwright, Deborah E.

Key words for index: Amnesia. Health and handwriting.

2856. JFS. 32:1151-74, Sept. 1987.

On the relative aging of ink; the solvent extraction technique.

Author(s): Cantu, Antonio A. Prough, Ronald S.

Key words for index: Aging of inks. Dating inks.

2857. JFS. 32:1293-1304, Sept. 1987.

Classification of office copy machines from physical characteristics.

Author(s): James, Elizabeth L.

Key words for index: Photocopiers.

2858. JFS. 32:1502-6, Nov. 1987.

Training requirements and ethical responsibilities of forensic scientists performing ink dating examinations.

Key words for index: Dating inks. Ethics. Training and education.

2859. JFS. 32:1511-21, Nov. 1987.

Determining the relative age of ballpoint inks using a single-solvent extraction technique.

Author(s): Brunelle, Richard L. Breedlove, C. H. Midkiff, Charles R.

Key words for index: Dating inks. Solvent extraction.

2860. JFS. 32:1522-36, Nov. 1987.

Critical evaluation of current ink dating techniques.

Author(s): Brunelle, Richard L. Cantu, Antonio A.

Key words for index: Dating inks.

2861. JFS. 32:1565-73, Nov. 1987.

Reagents for chemical development of latent fingerprints: vicinal triketones; their reaction with amino acids and with latent fingerprints on paper.

2862. JFS. 32:1730-53, Nov. 1987.

Uses and effects of forensic science in the adjudication of felony cases.

Author(s): Peterson, Joseph L. Houlden, Pauline J. Mikajlovic, Steven.

Key words for index: Criminal trials. Forensic evidence.

2863. JFS. 32:1775-81, Nov. 1987.

System for handwriting classification.

Author(s): Taylor, Linda R. Chandler, Howard.

Key words for index: Classification of handwriting.

2864. JFS. 33:154-66, Jan. 1988.

Microfilm documents; what are the boundaries in document examination?

Author(s): Hanna, Georgia A.

Key words for index: Forensic handwriting analysis.

2865. JFS. 33:167-75, Jan. 1988.

Study of the handwriting of adolescents.

Author(s): Masson, Janet Fenner.

Key words for index: Adolescent handwriting.

2866. JFS. 33:244-8, Jan. 1988.

Examination of sequence of strokes with an image enhancement system.

Author(s): Schuetzner, Ellen Mulcrone.

Key words for index: Sequence of lines.

2867. JFS. 33:310-8, March 1988.

Laser examination as an additional non-destructive method of ink differentiation.

Author(s): Zimmerman, Jeannine. Mooney, Dennis.

Key words for index: Ink analysis. Non-destructive tests.

2868. JFS. 33:328-35, March 1988.

Class defects in printwheel typescript.

Author(s): Behrendt, James E.

Key words for index: Print wheel typewriter.

2869. JFS. 33:357-77, March 1988.

Electrostatic detection apparatus (ESDA) and its effects on latent prints on paper.

Author(s): Moore, David S.

Key words for index: EDD. Fingerprints.

2870. JFS. 33:457-65, March 1988.

Deciphering bloody imprints [on paper] through chemical enhancement.

Author(s): Doherty, Paige E. Mooney, Dennis J.

Key words for index: Blood stains. Fingerprints.

2871. JFS. 33:527-9, March 1988.

ANS (8-Ani Linonaphthalene-1-sulfonate) - a new reagent for detection of latent fingerprints.

Author(s): Cheng, Sheaw-Guey.

Key words for index: Ultraviolet.

2872. JFS. 33:638-47, May 1988.

Some special observations of infrared luminescence.

Author(s): Cantu, Antonio A. Prough, Ronald S.

2873. JFS. 33:709-17, May 1988.

Erasable felt-tip writing instrument detection.

Author(s): Zimmerman, Jeannine. Doherty, Paige E. Mooney, Dennis.

Key words for index: Erasable ink. Felt-tip pens. Non-destructive testing.

2874. JFS. 33:727-33, May 1988.

Disguised writing: chronic or acute?

Author(s): Franck, Frankie E.

Key words for index: Disguised handwriting. Handwriting expert testimony.

2875. JFS. 33:744-50, May 1988.

Comments on the accelerated aging of ink.

Author(s): Cantu, Antonio A.

Key words for index: Aging of documents. Aging of inks.

2876. JFS. 33:756-63, May 1988.

Processing photographic films by infrared inspection.

Author(s): Jones, Steven Paul.

Key words for index: Photographic negatives.

2877. JFS. 33:764-6, May 1988.

Accurate method of focusing infrared photography.

Author(s): Rademacher, Gregory P.

2878. JFS. 33:773-8, May 1988.

Methylene blue revisited; the search for a trouble-free erasure sensitive powder.

Author(s): Riker, Mary A. Lewis, George W.

Key words for index: Bicarbonate of soda. Powders. Toners.

2879. JFS. 33:779-86, May 1988.

Letter quality impact hammer impressions.

Author(s): Anthony, Arthur T.

Key words for index: Impact printers.

2880. JFS. 33:835-41, May 1988.

Alleged tampering with mail of Dr. Yelena Bonner.

Author(s): Grantham, Steven M.

Key words for index: Bonner, Yelena. Postal law violations.

2881. JFS. 33:969-76, July 1988.

Computer-aided seal discriminating system.

Author(s): Tang, Gregory Y.

Key words for index: Computers in document examination.

2882. JFS. 33:1015-21, July 1988.

Do forensic science programs fulfill the needs of the forensic science community?

Author(s): Higgins, Kathleen M.

Key words for index: Training and education.

2883. JFS. 33:1027-30, July 1988.

5-methoxyninhydrin; a reagent for the chemical development of latent fingerprints that is compatible with the copper-vapor laser.

Author(s): Almog, Joseph. Hirshfeld, Amiram.

Key words for index: Ninhydrin.

2884. JFS. 33:1065-8, July 1988.

Appropriate educational background for entry level forensic scientists; a survey of practitioners.

Author(s): Siegel, Jay A.

Key words for index: Training and education.

2885. JFS. 33:1071-3, July 1988.

Forensic science laboratory-forensic science program cooperation and relationship; the view from the forensic science laboratory.

Author(s): Lee, Henry C. Graensslem, R. E.

Key words for index: Training and education.

2886. JFS. 33:1074-80, July, 1988.
